— karlsruhe

# new

# Triple Time and Cost Savings!

The PARTS FINISHING trade fair trio provides exhibitors and visitors with even more added value. The event lasts for only two days and the booth concept is “reduced to the maximum” ... plus a wealth of new contacts, cutting-edge solutions, lots of opportunities for exchanging ideas and valuable touchpoints – live, hands-on.

**PARTS FINISHING covers three production steps which are crucial for quality: deburring, parts cleaning and surface finishing.**

The exhibitors will present offerings from these three main categories including systems, processes, tools and media for deburring, cleaning and surface finishing, as well as services and quality assurance. You'll benefit from the clear synergies which arise from amongst these three thematic areas. The trade fair focuses on its ultimate purpose: establishing and maintaining contacts between users and suppliers, but also amongst exhibitors (forming strategic partnerships, system supplier concepts etc.).

From stand-alone processes to networked production lines, visitors responsible for parts production will receive a complete overview of the state of the art, as well as trends and developments. You save time because everything is brought together at a single location, and you gain valuable information and knowledge through interaction with the exhibitors and presentations on application solutions – maximum benefit with minimal time investment.

**Distinct advantages for you as an exhibitor:**

- Reduced costs and resource consumption, increased efficiency and value.
- Running the trade fair for just two days consolidates the opportunities for establishing contacts and minimises the costs associated with travel, accommodation and personnel.
- Top-quality, customisable turnkey booth packages with fixed costs save valuable time, money and resources.
- Multi-stage direct mailings to all relevant national and international target groups.
- Suppliers can offer their complete range of products in all three areas, i.e. deburring, surface finishing and parts cleaning (if included in their product portfolios) and showcase their expertise.

## Leaner, Shorter, More Cost-Effective, More Attractive, More Efficient.

**Visitors, exhibitors and industry experts network with each other and exchange valuable knowledge in an intensive, dialogue-oriented, professional atmosphere.**

# PARTS FINISHING

DEBURRING  
SURFACE FINISHING  
CLEANING

A new trade fair that gets  
three processes rolling at once ...

The new, two-day event format combines 3 topics that belong together: deburring, surface finishing and cleaning! In other words: quality finishing for component edges and surfaces to the utmost degree of perfection.

**PARTS FINISHING, an Innovative Event Concept:**

Networking, meetings, exhibitions, shows, knowledge transfer, more vibrant, more effective and more efficient ... these are important focal points for PARTS FINISHING.

**Relevant Target Groups for Your Product Portfolio:**

+ Aerospace + drive and engine technology + automotive  
+ construction and agricultural machinery + e-mobility  
+ energy technology + vehicle manufacturing + precision engineering + fluid technology + aviation + machinery and systems manufacturing + medical technology + precision optics and sensor technology + stamping technology  
+ defence technology + tool and die making

intense and ...

perfect and ...

# innovative

PARTS FINISHING offers deburring, surface finishing and cleaning! The new event with an innovative format and booth concept will focus on high-quality finishing of component edges and surfaces. We present processes that belong together and open up new opportunities for expanding fields of business and creating added value for exhibitors and visitors.

# Our Exclusive Offerings for You

Top-quality booth packages with basic furnishings, comprehensive services, printing of wall graphics for a strong identity and customised add-ons save time and personnel for trade fair preparations.

Example 1, basic package with 12 m<sup>2</sup>

[open on two sides, 3 x 4 m] with storeroom, furnishings, lighting, electrical hook-up and other services

Example 2, comfort package with 16 m<sup>2</sup>

[open on two sides, 4 x 4 m] with booth ceiling, storeroom, furnishings, lighting, electrical hook-up and other services

It's also possible to rent booth floor space only and use your own or a rental booth, and to order services as required such as booth walls, storeroom doors, furnishings, carpeting, electrical hook-up, cleaning etc. via the Online Service Centre.

We would be happy to provide you with quotations in advance for trade fair planning. Simply send us an e-mail specifying the desired size and required equipment, and you'll receive our quotation without delay.

What does the initiator and industrial trade fair expert say about the new PARTS FINISHING exhibition in Karlsruhe in November 2025?

**“fairXperts will launch a new event in November 2025 – with good reason. We’ll combine three aspects which have long since been seen by the industry as a coherent whole: component deburring, surface finishing and parts cleaning.”** As an exhibitor, you’ll benefit from three events in one. You, as well as your visitors, will save time and money as a result. We offer attractive, contemporary exhibitor packages which are inexpensive and extra lean. After all, establishing and maintaining “best” possible relations with new and regular customers is increasingly more important than having the “biggest” booth. Register here and don’t miss out on this unique opportunity! Do you have questions for the trade fair promoter? I look forward to receiving your e-mail: [hartmut.herdin@fairxperts.de](mailto:hartmut.herdin@fairxperts.de)

Will we see you at the Karlsruhe Exhibition Centre on 12 and 13 November 2025?

**Hartmut Herdin**  
Initiator and Promoter

**You’ll receive a large package of services for a small marketing fee of just €300.00 (+ VAT). We support your marketing activities for a successful event:**

- Basic alphabetical entry in printed and online trade fair directories. A total of two free entries, i.e. 1 each in the product and reference industry directories. Further entries can be included for a fee.
- Printed and/or digital advertising materials: visitor flyers, posters, trade fair logos and individualised advertising banners with your booth coordinates.
- An unlimited number of admission coupons for complimentary day-passes. You won’t even be invoiced for redeemed coupons.
- Press service with pre-event coverage of the products you’ll be showcasing.
- Multi-stage direct mailings to all relevant national and international target groups.
- Targeted, effective advertising and press coverage, both printed and digital, in the national and international trade press and on social media.
